DETAILED ACTION

Specification

1. The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant cooperation is requested in correcting any errors of which the applicant may become aware in the specification.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-22 of U.S. Patent No. 6,229,161 and over claims 1-14 of U.S. Patent No. 6,727,529. Although the conflicting claims are not identical, they are not patentably distinct from each other. Claims 1-22 of the present invention is a similar version

Art Unit: 2818

of the claimed invention in claims 1-22 and 1-14 of the above-identified U.S. Patents with similar intended scope.

With respect to claims 1-22; It would have been obvious to one of ordinary skill in the art the time the invention was made to use the teachings of claim 1-22 of US patent 6,229,161 and claim 1-14 of US patent 6,727,529 about a Memory cell using Thyristors and his ordinary routine design skills in order to come up with claims 1-22 of the present applications for a purpose of exploring different configurations and improving the semiconductor device.

4. When responding to the office action, Applicants are advised to provide the examiner with the line numbers and the page numbers in the application and/or references cited to assist the examiner to locate the appropriate paragraphs.

5. A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) day from the day of this letter. Failure to respond within the period for response will cause the application to be abandoned (see M.P.E.P. 710.02(b)).

CONCLUSION

6. The prior arts made of record and not relied upon are considered pertinent to applicant disclosure: Gersbach (US patent 3.863,229) disclose a SCR or SCS memory array with internal and external load resistor.
